

To Whom it may concern,

Please do not do anything to change the Indiana telephone privacy act. Since I have been added to the State data base I have enjoyed the use of my telephone WITHOUT the constant bombardment of advertisers calling me at all hours of the day and night. I work some rather strange hours and it was really annoying and inconvenient to be woke up after only a couple of hours sleep just to listen to someone who wants to sell their product for a special price "For today only"!!! If I want to shop, I know how to go to the store. Since signing up it has been a real pleasure to answer the phone and talk to my FAMILY and FRIENDS which is my reason for having a phone in the 1st place. I have an unlisted number because I didn't want that type of invasion of my privacy and I might as well have not paid to have it taken out of the book. Once one advertiser has it they sell it to everyone which is why I was so thrilled when they put this law in the books in Indiana. Again...PLEASE do not allow these people who have already proven that they have nothing on their agenda except their own selfish interests to disturb me and my family anytime they choose!!! Shouldn't we be allowed one sanctuary in our lives....our home???
